EDUCATION

Vellore Institute of Technology
B.Tech, Computer Science and Engineering

September 2022 – May 2026
CGPA: 8.41

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3

Frontend: React.js, React Flow, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, FastAPI, REST API, Authentication (JWT, Google OAuth), Microservices

Data & Cloud: MongoDB, MySQL, Redis, AWS (S3, CloudFront), Vercel, Render

Practices & Tools: Git, GitHub, Postman, Object-Oriented Design, Database Design, Agile Workflow

PROJECTS

HireLane [\[GitHub\]](#) [\[Demo\]](#)

June 2026 – July 2026

Job Application Automation & Tracking Platform

- Developed a Chrome extension paired with a Node.js/Express API and React dashboard to automate and track job applications across 5 ATS platforms: Workday, Greenhouse, Wellfound, Internshala, and Naukri.
- Architected a layered field-classification system combining static mappings, MongoDB/Redis caching, and Gemini API fallback, reducing dependency on external calls for previously resolved form fields.
- Engineered deduplication logic for multi-stage Workday applications, consolidating what would otherwise be several stage-wise records into a single tracked application per candidate.
- Handled asynchronous, dynamically rendered forms through custom DOM event listeners and framework-compatible input simulation, ensuring compatibility across React- and Angular-based ATS front ends.
- Structured the extension's storage layer and dashboard sync to maintain real-time consistency between the browser and web app, implementing secure authentication with JWT and Google OAuth.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Redis, Gemini API, Chrome Extension APIs, JavaScript, JWT, Google OAuth

FlowMind-AI [\[GitHub\]](#) [\[Demo\]](#)

September 2025 – October 2025

No-Code Platform for Visual Workflow Design with Document Retrieval

- Designed a retrieval-augmented generation platform pairing a React.js frontend with FastAPI/Node.js services, using PyMuPDF for document parsing and SentenceTransformers for semantic embedding.
- Implemented vector similarity search to ground Gemini API responses in uploaded document content, with a SerpAPI fallback for queries falling outside document scope.
- Created a drag-and-drop workflow canvas in React Flow with 6+ configurable node types, letting non-technical users assemble retrieval pipelines visually instead of writing code.
- Applied usage-tiered access control at the FastAPI layer via JWT-authenticated sessions, capping free-tier accounts at 3 active workflows to support a freemium model.
- Managed state synchronization between the canvas UI and backend pipeline execution so workflow edits reflected instantly without manual re-runs.

Tech Stack: React.js, React Flow, Node.js, FastAPI, MongoDB, SentenceTransformers, PyMuPDF, Gemini API

CareerQuill [\[GitHub\]](#) [\[Demo\]](#)

August 2025 – September 2025

Resume Generation and ATS Scoring Platform

- Built a multi-factor ATS scoring engine using spaCy and fuzzy matching, weighting resumes across 8 scoring dimensions and surfacing results through a Python/FastAPI microservice.
- Curated and integrated a 1,100-entry job description dataset spanning 55 roles, averaging scores across 10 role-matched JDs per experience level for consistent, role-specific feedback.
- Developed a document generation pipeline supporting 6 resume templates, exporting to both PDF and DOCX formats from a shared data model.
- Deployed the frontend on Vercel and the scoring microservice on Render, securing the platform with JWT authentication and a MongoDB-backed user dashboard.
- Tuned the fuzzy-matching thresholds and scoring weights iteratively against sample resumes to reduce false-positive keyword matches.

Tech Stack: React.js, Tailwind CSS, Python, FastAPI, MongoDB, JWT, spaCy, scikit-learn

ACHIEVEMENTS

- Ranked in the top 15% out of 10,805 students on the GeeksforGeeks Coding Portal at VIT University.
- Curated a 1,100-entry job description dataset across 55 roles; ranked **#1** in Kaggle's NLP category with **19K+** views and **4K+** downloads ([Kaggle Link](#)).

CERTIFICATIONS

- Postman API Fundamentals Student Expert
